I purchased XM radio with my freedom of choice as an American. I am tired of the commercials and the overall crud on today's public airwaves, a media controlled by the mass left wing. The weather and traffic on WTOP here in DC is manipulated by marketing crud and is not comprehensive. I don't want that as a consumer, I would rather pay someone \$9 a month to provide weather, traffic, and music to me the way I want to hear it. This is what we call freedom of choice. As I see it, I am a subscriber of a private service, that found their customers fair and square. I do not feel that anyone other than the subscribers and those who publicly own that service have the right to dictate what should and should not be played on their airwaves. Maybe the broadcasters need to pull their head out of their butt and actually try to figure out why I left them as a customer and figure out how to bring me back as a customer. It sounds like they these people grew up as a "momma's boy" and like to go crying to the feds every time the smaller kid kicks them in the Jimmy. If XM weather and traffic is pulled from the airwaves, I will be going to the Irish embassy to file for dual citizenship. Every day this country makes me sicker and sicker, and although I am proud of the intentions behind our government, I am sickened by the fools that think they are competent to run it and even more so sickened by the special interests groups that think they help this country in any way. Since I park in the garage across from NAB almost once a week I will gladly stop in and give you an ear full if you so wish.
